HDMI to Component with Audio Converter

Convert HDMI to component video and analog audio

The KanexPro HDMI to Component audio-video converter is a classic fit for older, analog devices that needs seamless integration for today's home theater environments. It converts the HDMI input into analog component video for displays and projectors. The converter decodes the HDMI input signal and outputs to component signal with R+L audio. Ideal and cost-effective for legacy home-theater equipment that needs the transmission from HDMI sources. HDMI devices that are HDCP encrypted are not supported.

Features

- Convert HDMI signal into YPbPr (Component-video) and stereo audio
- Supports data rates to 6.75Gbps
- HDMI input resolutions up to 1080p(1920x1080@60Hz)
- Supports analog video output to 1080p & UXGA (1600x1200) with 10-bit DAC
- Decodes analog audio signal from HDMI
- Compact size
- 5VDC external power supply included

Specifications

Input: HDMI x1
